Subject: Bank of Arizona checking account

ry,

y ideas how to get around this? Currently the deposits are set up to go into my Florida nTrust bank account. As you know I have made every attempt possible to change the deposit structions, after the merchant account was opened. I have run into this final wall,

suggest the following:

open a new joint Bank of Arizona checking account - RMCR & ZaaZoom, I believe this will solve the issue ASAP.

if

ject: RE: Bank Acct. updated

f, it seems like I can not updated the bank accounts unless the bank ount is for your business. I will need to see a voided check or bank ter with your business name on it.
