

vaderbaum (12/29/2006 6:45:32 PM): 1/3 of the zaazoom customers were charged but exited on our page - we notify them on our page that their order has been processed and when they attempt to exit (x out) we place a warning pop-up box announcing that their order has been processed, yet 11 customers still are incomplete. We send them e-mails with a "click here" to complete their session - any ideas on how we get completion up front? Is there a better way to finish the application? any ideas?
